

Schedule of Licence Fee Options for use of the

UPF Certification Trade Mark

Effective from 21st December 2008

The UPF Certification Trade Mark is featured on the ARPANSA Ultraviolet Protection Factor (UPF) tags. Companies wishing to use the ARPANSA UPF tags must first licence use of this trademark. There are two fee structures for licensing use of this trademark. The purchase price of the UPF tags, and the number of fabric retests available, differs depending on the annual licence fee chosen. Licence fees are payable on application. Delivery costs are additional to the cost of the tags.

Australian companies pay the charges in the GST-included column. Non-Australian companies pay the charges in the GST-exempt column. All prices are in Australian dollars. The preferred methods of payment are in Australian dollars, either by bank cheque made out to "ARPANSA", by electronic funds transfer (EFT) or by credit card. Note that overseas EFT payments attract an additional bank fee of AUD\$20 per transaction. Contact the ARPANSA accounts section for specific details of payment by EFT and credit card.

Applicants for a licence to use the UPF Certification Trade Mark may select whichever of the following fee options that best suits their requirements:

UPF Certification Trade Mark licence fee and UPF swing tag prices

Table with 6 columns: Licence Fee Option, Annual licence Fee (\$ including Australian GST), Swing tag price (\$) including Australian GST (per pack of 500 tags)*, Annual licence fee (\$) excluding Australian GST, Swing tag price (\$) excluding Australian GST (per pack of 500 tags)*, Sample retests**. It lists Option One and Option Two with their respective fees and tag prices.

Swing Tags *

Swing tags are shrink-wrapped in bundles of 500 tags. The minimum order quantity is 500 tags. Specify your preferred method of delivery on the order form.

Fabric Retesting **

During the licence period licensees may submit, at no charge, up to the indicated number of previously tested fabrics for retesting by ARPANSA. This assists the licensee in checking for consistent product quality and ensures that test reports remain current for licensing purposes. To qualify as a retest, a sample must be of similar specification and colour to the original sample tested. Indicate if a sample is a retest by entering the ARPANSA job code for the original sample into the "Retest" column of the testing request form to ensure that no invoice is raised.
