

Survey management and funding

The 2007 - 2013 survey of mobile phone base station EME levels was carried out by ARPANSA with financial support from the [Mobile Carriers Forum](#) (MCF), a division of the Australian MobileTelecommunications Association (AMTA) the peak industry body for the telecommunications industry.

The survey was managed solely by ARPANSA with measurements being carried out by RF assessors accredited by the [National Association of Testing Authorities](#) (NATA). Financial support from the MCF was used to fund the contracts for the accredited measurements. Choice of exact measurement locations, analysis of results and preparation of summary data for internet publication was carried out by ARPANSA.
